BIOTEC Group about to complete its first project in Malaysia

BIOTEC is a Belgian company founded in 1984 in Wallonia Brabant, specializing in wastewater and organic solid waste treatment in tropical regions. Our extensive years of experience have allowed us building top of the art systems, methodology and technologies, making BIOTEC one of the world leaders in this field.

BIOTEC has opened its office in Malaysia for the South East Asia region in 2008 and is completing its first project here in Malaysia in 2010. The project mentioned is Ulu Kanchong Palm Oil Mill which is owned by Gan Teng Siew Realty. The project is under the Clean Development Mechanism of the UNFCCC program, which purpose it is to reduce greenhouse gasses as a global effort. The biogas is used for energy purposes in the biomass boiler for fiber and palm kernel shells savings.

BIOTEC is also a Bio Nexus status company awarded by the Government of Malaysia. Currently, BIOTEC is doing R&D in collaboration with Nottingham University in Semenyih, Selangor, performing certain activities pertaining to biogas production.

This year BIOTEC is also embarking in Indonesia where BIOTEC will be constructing 2 biogas plants in the palm oil mill sector. The biogas will be used to generate electricity via biogas engines.
